ENGINE & GEARBOX

AUCAN Engine 4F20 is an advanced engine+ gearbox power model designed based on German Industry 4.0 manufacturing process and crafted with strict German technical standard for passenger vehicle class of super quiet, super comfort, super power and super energy saving.

Bosch's cutting-edge high common rail direct injection technology at 2,000 bar injection pressure enhances fuel atomization, ensuring more efficient combustion and achieving an impressive over all fuel consumption of just **8.5L/100km**.

WGT supercharger excels in thrilling acceleration with superior torque and high-speed power.

10,000 km oil maintenance mileage, low maintenance cost, more efficient operation

101kW at 3500rpm, 330Nm at 1600-2800rpm accelerates to 40km/h in 4 seconds under heavy load.

330N-m Engine Torque

101kW

Engine Power

- Wide range of speed ratios and two overdrive gears, providing better power economy.
- Utilise six-speed shifter for optimised shift lever direction, enhancing the human-machine position and improving shifting feel.

Supports multiple driving modes:

Standard Mode Movement Mode Manual mode

- Includes uphill and downhill assistance function. Transmission Control Unit (TCU) will shift gears corresponding with size of vehicle slope to enhance driving safety and comfort.
- Equipped with high temperature and low temperature assistance function. TCU will modify transmission shift logic to improve vehicle drivability, safety and comfortability.

FEATURES & SAFETY

Front Air Conditioner

Adjustable air volume and direction to improve driving

Four-Panel Steering Wheel

Adjustable to improve the driving comfort and equipped with shift lever for easier operation.

Adiustable Seat

Adjustable and foldable, offering comfort, safety and storage space.

Adjust external rearview mirror, and lock doors and windows with a central dock at the driver's side.

Storage Space

Wider, more accessible and convenient storage.

7 inch MP5 Multiplayer

Includes radio, USB video playback, navigation and split air conditioning controller to adjusts electric heating and cooling.

Sun Visor with Bill Fold

Includes a bill fold, make-up mirror and anti-glare rearview mirror to prevent strong lights.

Unique Selling Points

| Suspension System | Drive System | Body System | Steering System | Anti-Corrosion Characteristics |
|--|--|--|---|--|
| Rear thin leaf springs and double wishbone torsion bar suspension for better comfort and steering stability. | Clutch hydraulic damping and torsional damping with a wide-angle clutch and extra disc for enhanced control comfort and improved NVH. | Reinforcing plates strengthen the body, reduce vibration for improved NVH. Side wrap felt enhances insulation and air conditioning, PVC+XPE carpet minimizes interior noise. | Upgraded hydraulic power steering with 11MPa pressure and 72dB low noise provides lightweight, precise steering for improved low-speed driving feel. | Chassis parts with ≥360h corrosion-resistant paint, Dacromet parts for ≥360h corrosion resistance, and PVF brake pipes for ≥720h corrosion resistance. |

Advanced Active Safety

Anti-lock Braking Prevent skidding where loss of steering System (ABS) + Electronic Brake control result from locked wheels and optimise braking performance for a more Distribution (EBD) enjoyable driving experience.

Electronic Stability Control (ESC)

Maintains vehicle stability through precise driving control and braking forces, aligning with driver input and integrated safety features for enhanced safety

Brake Priority System (BOS)

When encountered by a stuck accelerator, the brake will take control, reducing acceleration for a safe stop, effectively preventing accidents.

Automatic Emergency Braking and Lane Departure Warning Systems (AEBS + LDWS)

Detects and warns of potential forward collisions, intelligently adjusting vehicle speed to mitigate keep drivers informed of lane deviations

Passive Safety

High Rigid **Body Structure**

3H high-rigid body design ensures safety; reinforced floor griders enhance stability and bearing capacity.

Pretension three-point seat belt with limiter

All seats are equipped with pretension three-point seat belts with limiter to enhance passenger safety

Airbag + collision energy absorption zone + collapsible steering column

driver and passenger protection in a collision, a carefully designed interior enhances overall impact safety, and a collapsible steering column reduces the risk of driver injury.

SMT & SAT

SPECIFICATION

Auxiliary safety Reversing

Auxiliary Image

High-definition reverse image with guide lines facilitates easy and controlled parking by

Meets ECE R107 requirements; gray glass absorbs heat, softening light for enhanced

passenger comfort.
